

Judge Demo Guide

ProjectMind Workflow Pack

Best demo flow

Upload a PDF	A clear analyzing indicator appears.
Wait briefly	The UI flips to insights ready.
Open Dashboard	The project metrics update from the uploaded file.
Open Commissioning	Likely failures are flagged automatically.
Open Copilot	Ask a question and get a project-aware answer.
Export PDF	A real PDF summary downloads from the backend.

Best framing

Tell the judges that the app is a connected decision-support prototype, not a static mockup.
The value proposition is that one uploaded project PDF can update the entire operational picture.
